■ HEUSSER-Olives Locks mounting options Standard and kombi system

Two versions are available for the secure mounting of HEUSSER olives.

The kombi-mounting offers the following advantages:

- simplified installation through centering and alignment of the lock on the fitting
- easy replacement of handles, keys, cylinders, or digital levers
- uniform 30mm diameter hole in the wood for all locking and latch variants

■ Variety in material finish

Seamless integration into the surroundings

- high-quality surface finishing for a flawless appearance and exceptional durability.
- HEUSSER-Olives are available in various finishes.

■ HEUSSER/BURG-Olives digital

For new projects we recommend
using the TERZA-Kombi version
(see page 49).

Flexo.Cloud

Digital Olives

Flexo.Cloud is an innovative locking system solution with powerful cloud functionality. It enables convenient operation via card or app (iOS/Android). A particularly practical feature: the app also functions as a gateway, eliminating the need for additional hardware.

The Olive can be seamlessly integrated into existing HEUSSER systems, thereby supporting a sustainable transition into the digital world.

Features

- **Multuser Mode** – Multiple users can operate Olives via card or smartphone; locking data is deleted upon opening; one card can be used for multiple Olives simultaneously.
- **Private-Mode Light** - Olive permanently assigned to a single user; operation only via personalized card; one card can be used for any number of Olives.
- **Private-Mode (App)** - Olives personalized in the app; operation via app or registered card; no access for others; prerequisite for shared private mode.
- **Shared Private Mode (App)** - Olive in private mode can be shared with others; ownership remains with the primary user; access rights can be granted and revoked via the app.
- battery replacement without removing the Olive
- simple assignment of usage rights via the app
- logging of locking events in the cloud
- RFID-Standards: MIFARE® Classic, MIFARE® DESFire® EV, LEGIC®, ...
- ability to operate via Bluetooth® and RFID cards

Standard version

Material	Plastic
Surface	Black
Direction	For right and left hinged doors
Square pin	7/7/35 mm (for HD 19 mm)
Rosette	3087 with reduction 3087R3084 for TERZA with Kombi-sleeve

More options

Square pin	7/7/ special length
Rosette	R473-40B standard
Rod lock	For rod lock 3465 (see page 37)

Scope of delivery

1 x Olive Flexo.Cloud
1 x Rosette

The required batteries are not included in the scope of delivery. We recommend using original VARTA 1/2 AA H-R batteries, as only these ensure proper operation from our side.

■ HEUSSER/BURG-Olives digital

For new projects we recommend
using the TERZA-Kombi version
(see page 49).

Flexo.RFID

Digital Olives

Flexo.RFID is designed for common RFID standards and therefore offers maximum compatibility and future-proofing. Thanks to three individually configurable authorization levels, the system enables particularly flexible and user-friendly management of access rights—ideal for a wide range of everyday requirements.

The Olive can be seamlessly integrated into existing HEUSSER systems, thereby supporting a sustainable transition into the digital world.

Features

- **Multiuser-Mode** with occupancy identification
- **Private-Mode** with and without automatic locking
- battery replacement without removing the Olive
- RFID Standard: MIFARE® Classic 1K/ MIFARE® DESFire EV
- integrated occupancy detection for MIFARE® Classic 1K
- up to 10 user cards can be registered in private mode
- long battery life (up to 25,000 locking cycles)

Standard version

Material	Plastic
Surface	Black
Direction	For right and left hinged doors
Square pin	7/7/35 mm (for HD 19 mm)
Rosette	3087 with reduction 3087R3084 for TERZA with Kombi-sleeve

More options

Square pin	7/7/ special length
Rosette	R473-40B standard
Rod lock	For rod lock 3465 (see page 37)

Scope of delivery

1x Olive Flexo.RFID
1x Rosette

The required batteries are not included in the scope of delivery. We recommend using original VARTA 1/2 AA H-R batteries, as only these ensure proper operation from our side.

■ HEUSSER/BURG-Olives digital

For new projects we recommend using the TERZA-Kombi version (see page 49).

Flexo.Code

Digital Olives

Flexo.Code impresses with intuitive operation and an ergonomic rotary knob. The Olive enables the secure storage of personal belongings, such as in offices, schools, as well as sports and wellness facilities.

The Olive can be seamlessly integrated into existing HEUSSER systems, thereby supporting a sustainable transition into the digital world.

Features

- up to 6-digit codes are available
- battery replacement without removing the Olive
- easy retrofit capability, e.g. for replacing mechanical Olives
- high-quality keypad with tactile feedback
- long battery life (up to 30,000 locking cycles)

Standard version

Material	Plastic
Surface	Black
Direction	For right and left hinged doors
Square pin	7/7/35 mm (for HD 19 mm)
Rosette	3087 with reduction 3087R3084 for TERZA with Kombi-sleeve

More options

Square pin	7/7/ special length
Rosette	R473-40B standard
Rod lock	For rod lock 3465 (see page 37)

Scope of delivery

1 x Olive Flexo.Code
1 x Rosette

The required batteries are not included in the scope of delivery. We recommend using original VARTA 1/2 AA H-R batteries, as only these ensure proper operation from our side.

3463 / 3463K

More options

Standard

The standard window handle can be locked from 6 o'clock to 12 o'clock and moved freely between these positions.

6 o'clock	lockable
6 - 12 o'clock	turnable
12 o'clock	lockable

MEVO

The MEVO design can be locked between 6 o'clock and 12 o'clock. With the turn of a key, the window handle can be turned either from 6 o'clock to 3 o'clock or from 3 o'clock to 12 o'clock. The shift between these two functions takes place at 3 o'clock.

6 o'clock	lockable
6 - 3 o'clock	turnable
3 - 12 o'clock	turnable
12 o'clock	lockable

Winter time

Winter time means the window handle can be turned either from 6 o'clock to 3 o'clock or from 6 o'clock to 12 o'clock. It can also be locked at 12 o'clock

6 o'clock	lockable
6 - 12 o'clock	turnable
12 o'clock	lockable

Tilt first

Tilt first means that the window handle can be freely moved between 6 o'clock and 3 o'clock. In the 3 o'clock position, the window handle can be released with one turn of the key for a turn towards 12 o'clock, and the key can then be removed. After the handle has been returned to 3 o'clock, turning from 3 to 12 o'clock is impossible once again.

6 - 3 o'clock	turnable
6 - 12 o'clock	turnable
Can be turned to 12 o'clock and back once	

All functions are the opposite way round for left-hinged windows!

■ 3465 Rod lock

3465 with 3401

3465 with 3401

3465W02

Purpose of use

For metal cabinets in industrial and office buildings.

Standard version

3465 rod lock with 3401 knob.

Special versions

3465W02 three-point closure with 14mm crank rocker
With 3411/12, 3413/14, 3413.2/14.2, 3481/82 knobs
(other types on request)

37 - 42	3	3080-2/16 black
42 - 47	3	3080-2/22 blue

Thickness of wood	Number / extensions	Combo casing 3080
18 - 25	1	3080 Zinc
25 - 35	2	3080 Zinc
35 - 45	3	3080 Zinc

Extensions should only be joined together using Loctite or superglue.

Rosettes

For metal and wood constructions

R3488

Rosette oval, 4 mm thick
Goes with the following doorknobs
• 3401/02
• 3411/12
Surfaces like the knobs

R3488

R3488/10-2

Rosettes oval, 10 mm thick
with M4 thread hole
Goes with the following
doorknobs
• 3401/02 with perforation
for safety ring
• 3411/12 with perforation
for safety ring
Surfaces like the knobs

R3488/10-2

R3488/10-4

Rosette oval, 10 mm thick
with M4 thread hole
Goes with the following
doorknobs
• 3401/02 with perforation
for safety ring
• 3411/12 with perforation
for safety ring
Surfaces like the knobs

R3488/10-4

R3488/10-6

Rosette oval, 10 mm with Ø
3.5 mm pin
Goes with the following
doorknobs
• 3401/02
• 3411/12
Surfaces like the knobs

R3488/10-6

R3405/17

Rosette rhombic, 17 mm
thick with M4 thread hole
Goes with the following
doorknobs
• 3405/06 with perforation
for safety ring
Surfaces like the knobs

R3405/17

Drilling jig / bit screwdriver

3400.01.A

3400.01.B

3000/2

3000BIT2

3400.01.A boring jig A

Purpose of use:
To bore mortice holes for doorknobs with stand-ard rosettes.

- Knob type

B3110T

Set of fittings for riser duct and electrical fronts

Purpose of use

Cupboard doors for riser zones in offices, industrial buildings, schools and hospitals. Especially suitable for heavy, non-combustible cupboard fronts. The hinges prevent the cupboard doors from descending by axial force and supported screws. Hidden installation possible, as the frame section can be faced. No annoying hinges on the inside, as they are mounted in the base or facing area.

Fittings for VSSM vertical duct and electric front EI30-RF1/EI30 (nbb) with VKF-No. 25548:

- B3110T.1 Basic set
- B3110T.Z1 Additional set 1 (door 1500 - 2200 mm)
- B3110T.Z2 Additional set 2 (door 2201 - 2600 mm)
- B3110T.Z3 Additional set 3 (door 2601 - 3000 mm)
- B3110T.S1 Strike plate set 1
(1-wing, for all heights)
- B3110T.S2 Strike plate set 2
(2-wing, for all heights)

Design

Material	Metal
Surface	Zinc-plated
Fixing material	Included

2720

Closing handle for furniture shutters

2720

Example of use

Purpose of use

Self-closing handle to lock standard cupboard shutters for use in administration, hotels and hospitals.

A shuttered cupboard can be locked in just a few steps: existing handles can be replaced by the 2720 locking handles and two strike plates can be affixed to the sides.

REHAU designs

Locking handle without cylinder with two side strike plates in a range of designs:

- Design for furniture cylinder with square (KIL min. 300 mm)
- Design for Euro profile half cylinder 17 mm (KIL min. 505 mm)

Order details

Surface	Real aluminium or steel-look
Length	KIL (interior body light)
Design	Version 1, version 2 or Version 3 (see following page)
Cylinder	Furniture cylinder design (Square) or Euro profile Half cylinder
Cylinder position	Central or in accordance with schematic
Lock opening	Clockwise or counter-clockwise

Can be integrated into lock system / cylinder retroactively

■ New generation HEUSSER-Inset Locks For secure fastening in the door leaf

Four series - one uniform screw connection. The characteristics of the new generation:

- dental hole pattern
- mutual screwing by fastening set
- secure fastening in the door leaf
- new safety standard for escape doors

Download

Digital manuel

■ Certified security

Heusser-Inset Locks according to EN 179 for your construction projects

- smooth approval of the building thanks to certified HEUSSER-Inset Locks
- according to EN 179 standard tested by the institutes ift, MPA
- with various lock manufacturers

Application example 1
for double-sided escape doors
S9.42.D3 combined with S1.0.D4

Application example 2
for sliding doors and wicket doors
S9.42.D3 combined with S9.20.D3

■ Less is more

Achieve lower construction costs
with flush-mounted Heusser-Inset Locks

- extend passage width / clearance width
- narrower corridor
- lower space requirement

■ Architectural harmony

Heusser-Inset Locks in desired colors

- painted, powder-coated in RAL, NCS, metal look
- metallic surfaces such as brass-plated, burnished
- suitable for your high-quality object

■ Securely closed

Double-leaf doors without open standing wing doors

- marking the operating order for users
- by coloring the handle in green, red

B1250.656SM

Purpose of use

For anti-theft external doors in accordance with SN EN 1627, tested in accordance with RC3

Design

Material	Zinc-plated steel (B1250.655) Stainless steel, matt (B1250.656) Stainless steel, black matt
Set	1 x pin + 1 hole 6 x SK securing screws 4.5 x 50 mm 2 spacers 2.8 mm / 3.3 mm
Assembly	Pin in door panel Pin slope towards fire

Tested in accordance with SN EN 1628, 1629, 1630 VSSM test report no. 9211-PB

Verwendung Distanzhalter

B1250.655/656/656SM

■ 2320

2320

Purpose of use

Deadlock for the chemical and food industries, electrical distribution cabinets and technical buildings

Standard version

Material	Stainless steel V2A 1.4301 /plastic
Bolt dimensions	50 mm
Direction	Can be used without migration left or right
Hole	For round (RZ/Ø22) or profile cylinders (PZ/EURO)
Can be integrated into lock system	

Special versions

Material	Stainless steel V4A 1.4404 / Plastic

EDEL-STAHL

8301

ELATO-3-bracket

8301

Purpose of use

Bracket for windowsills and shelves

Standard version

Bracket (U-shape with supporting bolts and screw plate Ø 45 mm)
Steel, zinc-plated blue

Product no. Length L

8301-9	9 cm
8301-12	12 cm
8301-15	15 cm
8301-18	18 cm
8301-21	21 cm
8301-24	24 cm

Special versions

Other pin lengths Ø 12 mm

Exemples de montage

8302

Spacer plate

8302A

8302B

Purpose of use

Spacer for shifting, balancing, underlaying and bridging in wooden and metal constructions.

Standard version

White polystyrene in two sizes with 5 plate thicknesses each.

Product no.	Measure	Thickness
8302AW01	40 × 60 mm	1 mm
8302AW02	40 × 60 mm	2 mm
8302AW03	40 × 60 mm	3 mm
8302AW05	40 × 60 mm	5 mm
8302AW10	40 × 60 mm	10 mm
8302BW01	30 × 45 mm	1 mm
8302BW02	30 × 45 mm	2 mm
8302BW03	30 × 45 mm	3 mm
8302BW05	30 × 45 mm	5 mm
8302BW10	30 × 45 mm	10 mm

Example of use

8303 INOX

Spacer plate

8303B

Purpose of use

Spacer for shifting, balancing, underlaying and bridging in wooden and metal constructions in areas of high traffic and for fire safety use

Standard version

Stainless steel in 7 plate thicknesses.

Product no.	Measure	Thick-ness
8303B01	30 × 45 mm	1 mm
8303B02	30 × 45 mm	2 mm
8303B03	30 × 45 mm	3 mm
8303B04	30 × 45 mm	4 mm
8303B05	30 × 45 mm	5 mm
8302B08	30 × 45 mm	8 mm
8302B10	30 × 45 mm	10 mm

Example of use

■ Fire safety

Door fittings, hinge safety catches, fire safety hinges

Fire-tested doors are tested in a fire laboratory as elements with suitable fittings. Our inset locks are completely made from stainless steel and pass all fire safety tests. The S6.42.D2 and S9.42.D3 models have also been tested and approved with locks from various manufacturers for emergency exits in accordance with EN 179.

Our hinge safety catches can reduce the burden on door hinges in the case of fire. Fire can exercise great pressure on one side of the door, leading to deformation of the hinges. The hinge safety catches in the door panel stabilise the doors and prevent excess deformation of the hinges. This means that fire safety doors can withstand fire for longer.

Fire safety has also become more important in furniture over the last 10 years. In large buildings, fire safety-checked riser zone covers are required across all floors to hamper the spread of fire across different floors. As well as our 3110T fire safety espagnolette lock, the VSSM worked together with Schlossfabrik Heusser AG to develop special hinges for riser zones. These are now part of the VSSM module for riser zones.
